Daniel,  
Thanks for letting me know. Please consider this email a grant of permission from ThoughtWorks, Inc. for you to use the names as you have stated in the email below.  
All the best,

Jeremy

The project is being called CruiseControl.NETCORE. It is a fork of the latest CruiseControl.NET (targeting .NET framework and Mono) code. The goal is to build a first class CI system for .NET core, ASP.NET Core, etc.

I would also be open to discuss ThoughtWorks sponsorship/adoption if interested and we reach maturation point.

Name usages:

"CruiseControl"

The project is logically in the CruiseControl "family" of projects, thought not ordained by ThoughtWorks.

"CruiseControl.NET" (long form)

The project is being called (long) CruiseControl.NETCORE, a derivative of this original name since it targets .NET Core.

Mentioning that this project is a fork of CrusieControl.NET.

"CCNET" (short form)

The project is being called (short) CCNETCORE, a derivative of this original name since it targets .NET Core.  
Mentioning that this project is a fork of CCNET.

"ThoughtWorks, Inc."

Only in existing source code copyrights and credit pages etc. And a disclaimer on the GitHub page that this fork and port to .NET Core is not an officially sanctioned project of ThoughtWorks (unless of course there is interest in doing

such since its been quite on this project).

Let me know if you have other questions.

Hope this helps.

~

I'm just wondering how you plan to use the names "CruiseControl", "CruiseControl.NET", "CCNET", and/or "ThoughtWorks, Inc." as part of the port you're doing. Could you give me an example?  
Thanks,

Jeremy

Jeremy, good to virtually meet you. Let me know what questions you might have. I simply want to make sure we are compliant with licensing and are good steward of the OSS community.
